Goals

- Based on the results of the survey, our goal is to create an application that can guide the students to a better choice.

Benefits

- This will help them to save time lost from choosing a wrong domain and to find their unlocked potential.
- The application will choose the appropriate universities by using the user's skills and personality.
- By choosing the right domain, the society evolves faster with a smaller percentage of unemployment, higher level of employee productivity and better use of the resources used in the educational system.
